

## annulenes

Monocyclic hydrocarbons without side chains of the general formula  $C_nH_n$  ( $n$  is an even number) or  $C_nH_{n+1}$  ( $n$  is an odd number). In systematic nomenclature an annulene with seven or more carbon atoms may be named  $[n]$ annulene, where  $n$  is the number of carbon atoms, e.g.  $[9]$ annulene for cyclonona-1,3,5,7-tetraene.
